Pixiv IDs

The convention of `creator:pixiv id 1234` stays despite being suboptimal. This is due to pixiv artists having terrible naming sense and changing their names far too often. The id is recognizable and always true. If the artist happens to have one name accepted and recognized by the public at large then maybe that should be the winning sibling. Ask Suika or prkc for more information why some pixiv artists are cancer.

Rating

Ratings for a few popular boorus and links to the page that outlines their definitions. These ratings are primarily for the level of sexual content with some of the boorus having additional ratings for other types of content of the precise type of sexual content.

Danbooru: Safe, questionable, explicit. https://danbooru.donmai.us/wiki_pages/howto%3Arate
