Bad Tag Shaming

This document exists entirely to shame some of the dumb tags that we have seen pushed to PTR. The creators might have thought these tags were clever, but they were not. They were fucking stupid.

Hall of Shame

The all time worst tags we've seen pushed to PTR, ever.

- `time: 9: 14`
  Why in dev's name did you think that was a good tag to push to PTR?

Bad Namespaces

These are basically entire categories of tags that are awful. Avoid using these namespaces please.

- `bodypart:`
  Listen. I don't need to know that a picture of a human has legs in it.
